E-mail:	support@environdec.com
Accountabilities for PCR, LCA and independent, third-party verification	
Product Category Rules (PCR)	
CEN standard EN 15804 serves as the Core Product Category Rules (PCR) 2019:14 Construction products, version 2.0.1	
PCR review was conducted by: The Technical Committee of the International EPD® System. A full list of members available on www.environdec.com . Chair of the PCR review: Rob Rouwette (chair), Noa Meron (co-chair). The review panel may be contacted via info@environdec.com .	
Life Cycle Assessment (LCA)	
LCA accountability: <i>Andrei Roşu, Jurie Potgieter and Dimitria Nunes (Ecochain Technologies) & Lokesh Anaparathi (Wavin)</i>	
Third-party Verification	
Independent third-party verification of the declaration and data, according to ISO 14025:2006, via:	
<input checked="" type="checkbox"/> EPD verification by individual verifier	
Third-party verifier: Martijn van Hövell (SGS)	
Approved by: The International EPD® System	
Procedure for follow-up of data during EPD validity involves third party verifier:	
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	

The EPD owner has the sole ownership, liability, and responsibility for the EPD.

EPDs within the same product category but registered in different EPD programmes, or not compliant with EN 15804, may not be comparable. For two EPDs to be comparable, they must be based on the same PCR (including the same version number) or be based on fully-aligned PCRs or versions of PCRs; cover products with identical functions, technical performances and use (e.g. identical declared/functional units); have equivalent system boundaries and descriptions of data; apply equivalent data quality requirements, methods of data collection, and allocation methods; apply identical cut-off rules and impact assessment methods (including the same version of characterisation factors); have equivalent content declarations; and be valid at the time of comparison. For further information about comparability, see EN 15804 and ISO 14025.

Information of the EPD Owner

Owner of the EPD: Orbia Building & Infrastructure (Wavin)

Address: World Trade Center Tower G5, Schiphol Boulevard 425, 1118 BK, Schiphol, the Netherlands

Main Contact: Lokesh Anaparthi (

Lokesh.anaparthi@orbia.com)

Product-related or management system-related certifications:

Quality management systems and environmental measures are implemented at all Wavin Calefa production sites, meeting national as well as international standards such as ISO 9001 (Quality Management System) and ISO 14001 standards (Environmental Management System).

Nordic Wavin A/S, Wavinvej 1, 8450 Hammel, Denmark quality management system:

- DNV Management System Certificate ISO 45001:2018
- DNV Management System Certificate ISO 14001:2015
- DNV Management System Certificate ISO 9001:2015
- DNV ISRS8 Level 6 Statement of Performance
- DNV Management System Certification – Guidelines 2021

About Wavin

Orbia's Building & Infrastructure business – **Wavin** is an innovative solutions provider for the global building and infrastructure industry. Backed by more than 60 years of product development experience, Orbia Wavin is advancing life around the world by building healthy, sustainable environments for global citizens. Whether it's to improve the distribution of clean drinking water, to make sanitation accessible for everyone, to create climate resilient cities or to design comfortable living spaces, Orbia Wavin collaborates with municipal leaders, engineers, contractors and installers to help future-proof communities, buildings and homes. Orbia Wavin has close to 11,000 employees across approximately 50 production sites worldwide, serving over 90 countries through a global sales and distribution network.

Wavin (an Orbia business) delivers integrated solutions across four key segments:

- **Building systems** for safe drinking water supply and wastewater drainage, including low-noise solutions.
- **Infrastructure systems** supporting community water supply, sewage, wastewater and stormwater networks.
- **Urban Climate Resilience (UCR)** solutions for rainwater infiltration, attenuation and blue-green roofs; and
- **Indoor Climate Solutions (ICS)** for advanced indoor temperature and ventilation control.

Together, these offerings help create healthier buildings and more resilient, sustainable communities worldwide. The company is headquartered in **Schiphol, The Netherlands**.

The products covered in this EPD form part of Wavin's **Indoor Climate Solutions (ICS)** portfolio.

Wavin Indoor Climate Solutions (ICS)

Wavin Indoor Climate Solutions is part of Orbia's Building & Infrastructure group, delivering advanced systems that combine **comfort, energy efficiency, and sustainability** for residential and commercial buildings. Our integrated portfolio ensures optimal indoor environments while aiming to optimise energy efficiency.

Our four core Indoor Climate Solutions include:

- **Heat Interface Units – Calefa**

Calefa sets new benchmarks for domestic hot water and space heating in district heating networks. Calefa integrates advanced features such as adaptive learning, which predicts usage patterns after two weeks to minimize energy waste; built-in weather compensation, automatically adjusting supply temperature based on outdoor conditions; and smart connectivity, enabling remote control and monitoring. Additional benefits include domestic hot water prioritization during peak times, a wireless outdoor sensor for multi-unit buildings, and fast commissioning for simplified installation. These innovations ensure exceptional efficiency, comfort, and sustainability in modern heat networks.

- **Surface Heating & Cooling – Comfia**

Comfia provides a complete range of components for underfloor and ceiling heating and cooling systems, delivering efficient thermal comfort for modern buildings. The solution includes high-quality pipes, precision-engineered manifolds, and insulated panels designed for quick installation and optimal performance. These elements work together to ensure uniform heat distribution, low-temperature operation, and compatibility with renewable energy sources. Comfia's modular approach supports flexible design for residential and commercial applications, while integration with smart controls enables precise regulation and energy optimization throughout the year.

- **Heat Recovery Ventilation - Ventiza**

Ventiza delivers a complete solution for mechanical ventilation with heat recovery (MVHR), ensuring healthy indoor air quality and energy efficiency. The system includes compact ventilation units, high-performance heat exchangers, and ducting components designed for easy installation and optimal airflow. Ventiza units recover up to 90% of heat from exhaust air, reducing heating demand and supporting compliance with energy-efficiency standards. Its modular design allows integration with other Wavin Indoor Climate Solutions, while smart control options enable precise regulation for comfort and sustainability.

- **Controls - Sentio**

Sentio is Wavin's intelligent control platform, engineered to manage several systems seamlessly. The solution comprises wired and wireless thermostats, zone controllers, and central control units that integrate with Comfia, Ventiza, and Calefa for a fully connected indoor climate system. Sentio offers advanced features such as predictive algorithms, remote access via app, and energy optimization tools, ensuring precise temperature control and improved efficiency. Its intuitive interface simplifies commissioning and enhances user experience across residential and commercial applications.

Product information

Product name: Wavin AHC 9000 Central Control Units (CCU)

Product identification: The product can be identified with an individual serial number, Model and model number.

Product description: The Wavin AHC 9000 Central Control Unit (CCU) is the main control center for the AHC 9000 system and its components. Wavin AHC 9000 wired or wireless room thermostats can be connected to provide temperature control to all connected heating zones. is able to control up to 16 zones as standard. An LCD display for access to additional functions and settings is available separately.

For more information, visit: [Brochure-Wavin-AHC-9000-serien.pdf](#)

UN CPC code: UN CPC: Division 48, Group 482, Class 4826 Subclass 48269 Measuring, checking, regulating or controlling instruments, appliances and machines n.e.c.

ETIM Classification: EC011480

Production Location: Nisou, Czech Republic

Multiple products coverage: This EPD covers multiple products from the Wavin AHC 9000 Central Control Units (CCU) range. All products included are manufactured using comparable materials, electronic components and production processes. The declared unit is 1 piece of the CCU representing a worst-case scenario within the product group.

The environmental impacts reported in this EPD therefore represent the highest impact within the covered product range. For lighter models, impacts can be considered equal or lower than the values reported.

Wavin AHC 9000 Central Control Unit products covered in this EPD

Product	Description	Image	Mass (g/pc)*
4042051 - 16 circuits incl display	This unit is the main control centre for the AHC 9000 system and its components. The unit is able to control up to 16 zones as standard with an LCD display for access to additional functions		1383
4042052 - 16 circuits, no display	This unit is the main control centre for the AHC 9000 system and its components. The unit is able to control up to 16 zones as standard without an LCD display		935
4060549 - only 2 circuits, no display	This AHC 9000 control unit is designed for smaller systems of 1-2 zones. AHC 9000 wired or wireless room thermostats can be connected to provide temperature control to all connected heating zones		593

*includes packaging

Content Declaration

Product components	Weight, g	Weight-% (versus the product)	Biogenic material, weight-% and kg C/kg
Plastics	603	43.6%	0
Electronics	578.3	41.8%	0
TOTAL	1181.3	85.4%	0

All products declared share the same primary materials, housing design, and electronics. Minor variations between the products may occur due to the inclusion of specific functional components. These variations are limited and do not materially affect the overall composition or environmental performance of the product group.

Packaging materials	Weight, g	Weight-% (versus the product)	Weight biogenic carbon, kg C/kg
Paper/cardboard	200.9	14.5%	0.065
Plastic	0.8	0.1%	0.00
TOTAL	201.7	14.6%	0.065

Dangerous substances: The product do not contain Substances of Very High Concern (SVHC) from the candidates list in concentrations exceeding 0.1 % (w/w).

LCA information

Declared unit: 1 piece of Wavin AHC 9000 Wireless Thermostat.

Geographical scope: Modules A1-A3: Czech Republic, Modules A4-A5, B6: DK, HU & NL, Modules C1-C4, D: Europe

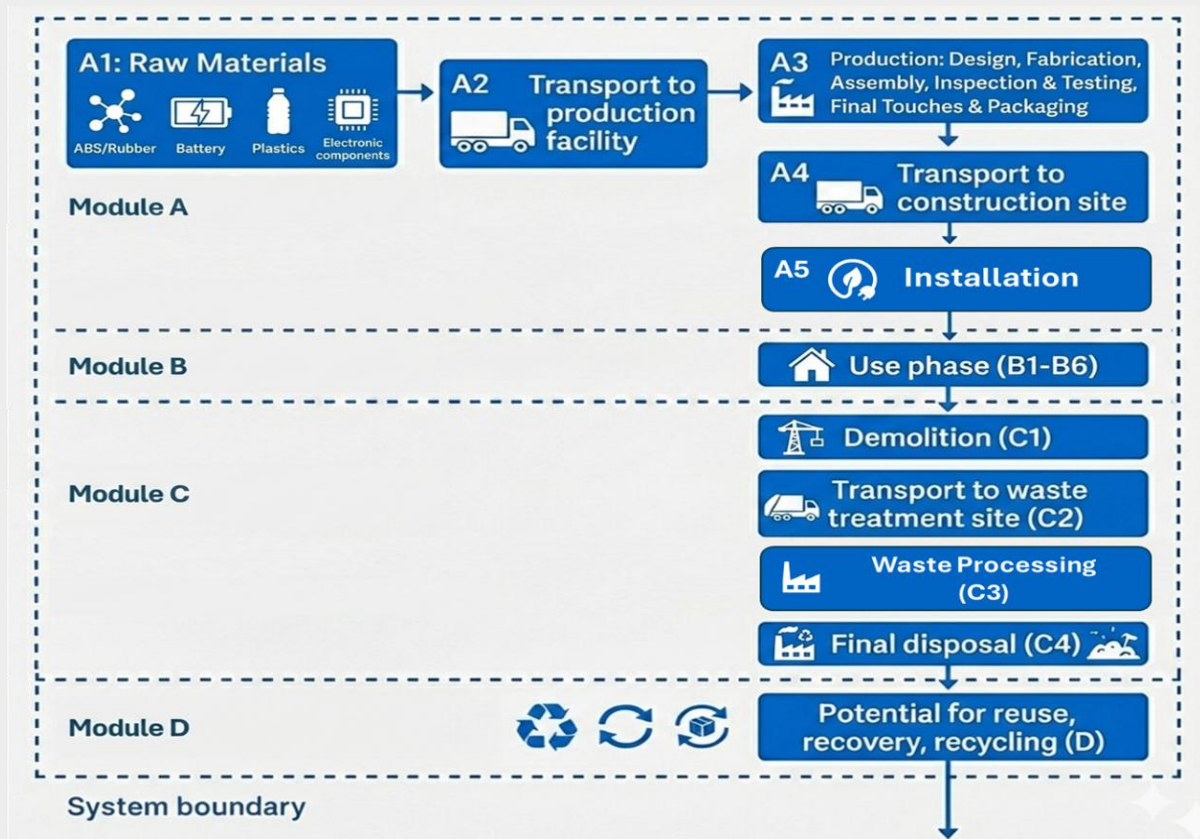

Technical lifespan: The technical lifespan for this product is 10 years.

Time representativeness: Primary data used cover the production year 2023.

Database(s) and LCA software used: *Ecoinvent database 3.9.1* with EN 15804+A2 impact assessment method was used for the LCA modelling in *Ecochain Helix v4.3.1*.

Description of system boundaries: This EPD covers a **cradle-to-gate with options system** boundary, including modules A1–A3, A4, A5, B6, C1–C4, and D. Modules B1, B2, B3, B4, B5, and B7 are not declared, as they are not relevant for this product system.

System Diagram: An overview of the system is presented below in the system diagram.

Information on life cycle stages covered

Modules (A1 - A3): This stage starts with the production of the extracted raw materials into necessary components such as electronics, batteries and plastics (A1). The components are then transported to the production facility by truck (A2). The final production includes all energy, and material flows necessary to produce the final product (A3). The production processes are modelled using specific values from primary data collection at the production site. All relevant production processes in module A3, like packaging materials and production losses, have been included in this assessment.

Information on Electricity used

The electricity is modelled using the Ecoinvent v3.9.1 dataset “Electricity, low voltage, residual mix - Czech Republic”. The impact of this dataset is **0.7577 kg CO₂-eq / kWh**.

Modules (A4 - A5): This stage includes transportation to the customer installation site. An average distance was assumed based on markets where products are sold and this is modelled using “market for transport, freight, lorry, unspecified | Europe” (A4). After customer receives the product the installation is done manually and therefore no energy is needed. The waste disposal of packaging materials only is therefore considered in this scenario (A5).

Use and End-of-Life scenarios

Operational energy use (B6): This stage accounts for the electricity consumed by the product during operation, including standby consumption and daily demand. This reflects the total energy use over the 10-year reference service life.

Deconstruction/demolition (C1): This stage includes the demolition and removal of the product, which is done manually and therefore no energy is needed.

Transport to waste processing (C2): This stage includes transportation of demolished products to waste treatment facilities based on actual transportation distances. See the assumptions on distance and transport mode in the table below.

Waste processing for reuse, recovery and/or recycling (C3): This stage includes the required waste processing for the product’s region. See the assumptions on waste processing scenarios in the table below.

Disposal (C4): This stage includes processes for components and waste that could not be recycled in module C3. See the assumptions on waste processing scenarios in the table below.

Reuse, recovery and/or recycling potential, expressed as net impacts and benefits (D): See the assumptions on waste processing scenarios in the table below.

Applied End-of-Life scenarios for main materials & packaging

Material category	Landfill	Incineration	Recycling
Acrylonitrile Butadiene Styrene (ABS)	10%	20%	70%
Battery (lithium)	10%	20%	70%
Polypropylene (PP), black	10%	20%	70%
PP tape	10%	20%	70%
LCD	10%	20%	70%
Electronic component (passive)	10%	20%	70%
RVS steel screw/nut/clasp	10%	20%	70%
Electronic component (active)	10%	20%	70%
PET component	10%	20%	70%
PCB	10%	20%	70%
Packaging, polyethylene (PE)	10%	85%	5%
Packaging, paper/cardboard	0%	28%	72%
Transport distance to waste processing facility by truck with empty return (km)	80	130	80

Cut-off Criteria: All relevant inputs and outputs such as emissions, energy, and materials have been considered in this LCA. In accordance with EN 15804+A2:2019, the total neglected input flows per module do not exceed 5% of energy use and mass. In this LCA, waste processes are allocated to the relevant module.

When secondary materials or energy recovered from secondary fuels are used, the system boundary between the system under study and the previous system (providing the secondary materials) is set at the point where outputs of the previous system e.g. materials, products, building elements, or energy reach the end-of-waste state.

Allocation: The system boundaries adopted are in accordance with the modular approach specified in EN 15804+A2:2019. Since the full BOMs were taken into account, no product material flows have been excluded in A1. The only excluded emissions are from personnel processes, infrastructure and capital goods. Manufacturing energy and site emissions were allocated based on mass of finished product relative to total annual production mass.

Modules declared, geographical scope, share of specific data (in GWP-GHG results) and data variation (in GWP-GHG results):

	Product stage			Construction process stage		Use stage							End of life stage				Resource recovery stage
	Raw material supply	Transport	Manufacturing	Transport	Installation	Use	Maintenance	Repair	Replacement	Refurbishment	Operational energy use	Operational water use	De-construction demolition	Transport	Waste processing	Disposal	Reuse-Recovery-Recycling-potential
Module	A1	A2	A3	A4	A5	B1	B2	B3	B4	B5	B6	B7	C1	C2	C3	C4	D
Modules declared	X	X	X	X	X	ND	ND	ND	ND	ND	X	ND	X	X	X	X	X
Geography	Czech Republic			DK, HU, NL		-	-	-	-	-	DK, HU, NL	-	Europe				Europe
Specific data used	2.46%			-	-	-	-	-	-	-	-	-	-	-	-	-	-
Variation - products	< 41%			-	-	-	-	-	-	-	-	-	-	-	-	-	-
Variation - sites	Not relevant			-	-	-	-	-	-	-	-	-	-	-	-	-	-

Modules/life-cycle stages declared = “X”

Modules/life-cycle stages not declared = “ND”

Additional information: The LCA results presented in this EPD are based on the “EN 15804 reference package” using Environmental Footprint (EF) version 3.1. The estimated impact results are only relative statements, which do not indicate the endpoints of the impact categories, exceeding threshold values, safety margins and/or risks.

Data Quality: The data quality assessment covers geographical, technological and temporal representativeness and follows the data quality criteria of Annex E, Table E.2 of EN 15804+A2:2019. The assessment identified no datasets rated as poor or very poor among those contributing at least 80% of the environmental impact results, in accordance with EN 15804+A2 and EN 15941 requirements.

Overall data quality has been evaluated as **good for geographical and technological representativeness and very good for temporal representativeness.**

Process	Source type	Source	Reference year	Data category	Share of primary data, of GWP-GHG results for A1-A3
Raw material supply	Database	Ecoinvent v3.9.1 Cut-off and Plastics Europe (POM)	2022, 2019	Secondary data	0,00%
Manufacturing of product, including generation of electricity used in manufacturing of product	Collected production data, Electricity data from Ecoinvent v3.9.1	EPD Owner Ecoinvent v3.9.1 Cut-off	2022	Primary data	0.75%
Transport of materials & packaging to manufacturing site	Ecoinvent v3.9.1	Ecoinvent v3.9.1 Cut-off	2022	Primary data	1.71%
Total share of primary data, of GWP-GHG results for A1-A3					2.46%

Materials for energy recovery	kg	0.00E+00	0.00E+00	0.00E+00	0.00E+00	0.00E+00
Exported energy, electricity	MJ	0.00E+00	0.00E+00	0.00E+00	0.00E+00	0.00E+00
Exported energy, thermal	MJ	0.00E+00	0.00E+00	0.00E+00	0.00E+00	0.00E+00

Abbreviations

Abbreviation	Definition
EN	European Norm (Standard)
EPD	Environmental Product Declaration
EF	Environmental Footprint
GPI	General Programme Instructions
ISO	International Organization for Standardization
LCA	Life Cycle Assessment
PCR	Product Category Rules
ETIM	European Technical Information Model
CEN	European Committee for Standardization
PP	Polypropylene
ABS	Acrylonitrile Butadiene Styrene
HDPE	High-Density Polyethylene
PE	Polyethylene
Pb	Lead (<i>as SVHC in brass</i>)
SVHC	Substances of Very High Concern (REACH)
DK	Denmark
HU	Hungary
NL	Netherlands
ICS	Indoor Climate Solutions
UCR	Urban Climate Resilience
