Comfia IX F+P Manifold

For all surface heating and cooling applications

Product Information

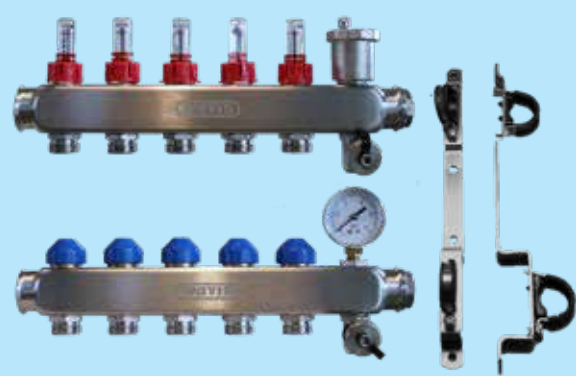

Stainless steel manifold is designed for reliable and efficient water distribution in underfloor heating systems.

Material: All brass components are made of CW617N brass and manifold body is made of stainless steel for providing excellent durability and corrosion resistance.

Connections: Comfia IX Manifold is equipped 3/4" eurocone connections and 1" mains connection for easy mounting of underfloor heating systems.

Accessories: Return manifold is equipped M30x1.5 thread allowing direct installation of compatible thermal actuators. Comfia IX manifold can be used the Alpha actuator usable with VA90 adapter or the Arina actuator.

Product Range: Comfia IX manifold is available in configurations from 2 to 12 heating circuits, offering flexibility for projects of various sizes. Each manifold is supplied complete with drain valves, automatic air vent, manometer and brackets for simplified commissioning, venting, and maintenance.

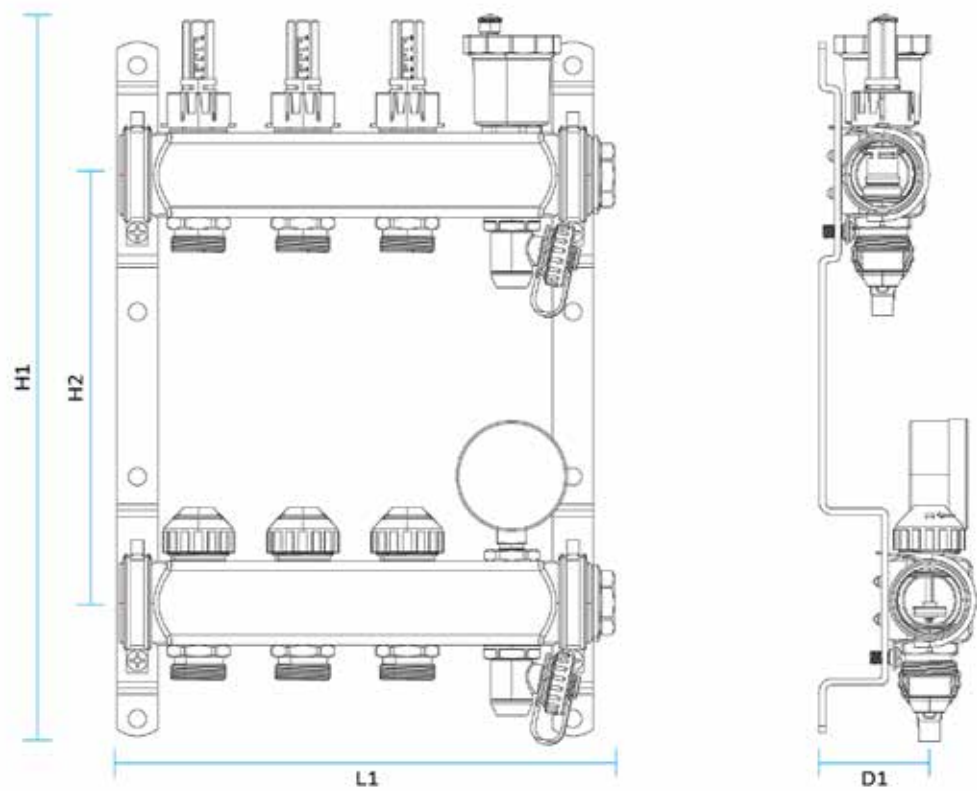

Technical Data

Mains connection	DN25 / 1"
Pipe circuit connection	3/4" Eurocone
Max. working temperature	70 °C
Max. working pressure	8 bar at max. 60° C / 6 bar at max. 70° C
Return valve connection	M30 x 1,5 (Adapter VA90)

Materials	
Body	Stainless Steel AISI 304
Connection	Nickel-plated brass CW617N
