Underfloor heating control system

Advancing
Indoor
Comfort

Your project deserves Sentio

wavin

An Orbia business.

Experience exceptional indoor comfort with Sentio

Smart design meets everyday living with the intelligent underfloor heating control system, Sentio. Designed with a focus on user comfort and energy efficiency, the system learns user habits and adjusts proactively to maintain the perfect temperature in every home.

Advanced technology ensures a comfortable indoor environment while optimising energy use — helping you enjoy lower heating bills and a reduced CO_2 footprint.

Sentio is more than a temperature control system — it's an investment in a smarter, more sustainable lifestyle.

Commisioning

Connectivity
Connect to 3rd party products, such as heat pumps and dehumidifiers, via Modbus, and enjoy automatic software updates and access to apps through Wi-Fi.

Seamless combination
Underfloor heating and radiator thermostats work together and can be controlled through the same app.

Easy installation
Smart features and a simple three-step process makes installation of the Sentio system quick and easy.

Exceptional reliability
Flexible and robust connections between all system units ensure reliable and efficient performance.

Remote service via SmartConnect
A powerful tool designed for remote maintenance, service and monitoring to optimise customer support.

Service

App control
Planning and real-time adjustments via the Sentio app gives end-users extraordinary control of their own indoor climate — even remotely.

Stylish design
Sentio room thermostats are designed to blend in elegantly and subtly, lighting up only when operated.

Use

Zone control for energy efficiency
Set individual temperatures in each room to save energy by reducing heating of unoccupied spaces.

Precise comfort with auto-balancing
Advanced control features, such as auto-balancing, ensure that every room is heated to the desired temperature at all times.

Installation

Built-in weather compensation
Adjusts inlet temperature based on outdoor conditions, saving energy, increasing comfort and extending system lifespan.

Unparalleled flexibility
Wired and wireless devices are seamlessly and securely combined in the same installation.

Stylish design with optimal comfort

Every heating system is a canvas. An opportunity to create lasting impact with the right details. And to shape how buildings perform. To do that, you need a controller that is ready to support your ambitions — project after project.

That's why we've created Sentio. A cutting-edge controller that combines advanced control and an exceptional user experience to give you a competitive advantage.

Zone control adjusts the room temperature and increases comfort and energy efficiency

By adapting the temperature to the room's use and occupants' preferences, you can ensure perfect control in every room. Keep bedrooms cool to improve sleep, while living areas remain comfortable.

Automatic adjustments, such as lowering the temperature in unused areas, help reduce energy consumption. The Sentio system makes it easy by adapting to user routines, providing an efficient, energy-saving solution with optimal comfort – all via the user-friendly, easy-to-use app.

Built-in weather compensation

Efficient heating requires constant adjustment to external factors. With built-in weather compensation, Sentio ensures the system automatically adjusts to external temperatures to maximise energy efficiency with minimal hassle.

Seamless combination

Wavin systems are designed for long-term comfort and simplicity. Your customers benefit from integrated climate control across heating sources, including underfloor and radiator heating — all managed through one intuitive app for a truly seamless experience.

Reliable connections for uninterrupted performance

With Sentio, your heating control simply works. No unreliable connections. No callbacks. No alarms. Just seamless heating that lasts — from day one. State-of-the-art communication protocols ensure hassle-free installation and flawless user comfort.

Sentio helps you achieve uninterrupted performance and a reputation you can rely on — for every project, big or small.

Precise comfort in every room

Sentio offers a range of smart features that help maintain the desired temperature in every room at all times.

Zone control makes it possible to set different temperatures in different areas of a building, while auto-balancing ensures those temperatures remain stable at all times.

This not only increases comfort, but also improves efficiency and meets the most demanding standards, including TÜV certification.

Seamless connectivity

Sentio makes connectivity effortless, integrating floor heating with other building systems and devices, such as heat pumps, ventilation and dehumidifiers, via Modbus.

And with the possibility to mix wired and wireless connections, Sentio offers the best of both worlds, including over-the-air software updates and unfailing connections.

Advancing Indoor Comfort with Wavin

- Surface heating and cooling
- Heat interface units
- Mechanical ventilation
- Smart control systems

From family homes to apartments, Wavin stands as the trusted choice for a comprehensive indoor climate solution.
Through innovative controls, it seamlessly integrates underfloor heating, ceiling heating and cooling, heat interface units and mechanical ventilation.

All components work harmoniously in a unified solution, Advancing Indoor Comfort with efficiency and ease.

Wavin is part of Orbia, a community of companies working together to tackle some of the world's most complex challenges.
We are bound by a common purpose:
To Advance Life Around the World.
