

How to identify metric and imperial Hep₂O fittings and pipe inserts

The Hep₂O Plumbing and Heating system is available in metric and imperial sizing. It is important to use the correct pipe inserts, fittings and pipe for each system. They are not interchangeable.

See below a quick guide on identifying metric and imperial Hep₂O.

Metric Hep₂O Fittings

Pipe Insert
Metric inserts have a rounded end with 4/5 raised pips (dependent on size).

Raised pip

White Collar Sizing Info. Black O-ring

15 mm 22 mm 28 mm

Imperial Hep₂O Fittings

Pipe Insert
Imperial fittings have a flat end with 3 raised pips.

Raised pip

Sizing Info. Blue O-ring Grey Collar

1/2" 3/4" 1"

Pipe and fittings come in colour coded packaging to easily identify the size.

Converting from imperial to metric Hep₂O?

Metric Hep₂O offers the widest range of fittings and pipe. See datasheets on how to easily convert.
