Wavin Turkey

PP-R/PP-RCT System

Wavin PP-R/PP-RCT Pipes

All mono layer and multilayer pipes made from TYPE 3 PP-R or TYPE 4 PP-RCT raw material are in sizes between 20 to 125mm. Different color options are available.

Wavin PP-R Fittings

All full plastic or metal inserted fittings are made of Type3 PPR raw material and can be used together with PP-R or PP-RCT pipes. Fitting sizes are between 20-125mm. Different color options are available.

Characteristics of the System

The Wavin PP-R/PP-RCT system is a polyfusion welded system made of polypropylene (PPR, PP-RCT). The system includes all-plastic and multi-layer pipes and a wide range of all-plastic or combined (plastic, metal) pipe fittings. Also includes a vast selection of accessories and assembly tools.

Application

Wavin PP-R/PP-RCT can be used for piping in residential, administrative and cultural buildings as well as for industrial or agricultural piping. Wavin PP-R/PP-RCT is designed for transporting cold and hot water, for underfloor heating, and, if these assembly instructions are followed, even for central heating. Wavin PP-R/PP-RCT can also be used to transport air, cooling water and for air-conditioning. Using the piping's chemical resistance and other properties for transporting other liquids, gases or solids requires individual assessment for each use case. The manufacturer needs to assess the suitability of the piping if the hot water conducted through it is chemically disinfected. Permanent disinfection of hot water using chlorine dioxide shortens the life of the system and is therefore not recommended.

Product Portfolio and Features

- ① Products are produced in Wavin's Turkey factory in Adana according to EN ISO 15874 standard.
- ① Different type of pipes for different application areas...
Mono layer PP-R and PP-RCT Pipes for hot&cold water applications and Multilayer pipes for heating applications.
- ① Multilayer pipes are made of PP-R and PP-RCT raw material with different middle layer fiber composition...
- ① All plastic fittings are ready for perfect welding performances like coupler, bends, tees, manifolds, caps and clips.
- ① Fittings with inserts are ready to use with metallic installation parts like valves, manifolds, unions, pumps and radiators.
- ① Metal inserts which are in contact with drinking water are non-coated brass inserts.
- ① Different color options for different markets: White, Green and Grey.
- ① International certificates: DVGW, AENOR, CSTB, WRAS.

Building Healthy, Sustainable Environments

At Wavin, our global purpose is clear: **"Building Healthy, Sustainable Environments."** One of the key pillars in achieving this vision is ensuring a **"Safe and Efficient Water Supply."** We prioritize human health in every aspect of our **product portfolio**, offering **PPR pipes and fittings, multilayer composite pipes, and advanced plumbing systems** that guarantee durability, hygiene, and efficiency. With innovative **products** designed for reliability and sustainability, we are committed to building a healthier and more sustainable future.

In alignment with the European Drinking Water Directive and the latest hygienic standards for materials in contact with drinking water, **nickel coating is no longer permitted for tap water installations**. As a result, we have proactively removed nickel coating from our **PPR fittings with metal inserts** used in drinking water applications worldwide - ensuring safer, more compliant, and high-quality solutions for a healthier future.

The new PPR Fittings are non-coated brass alloy which is in the acceptable alloy list in 8th revision of 4MS 2017. Metal deactivators are used in the recipe in order to avoid any damage on plastic parts that may be caused by free metal ions from inserts. This application is valid for every color of fitting. PPR Fittings will continue to meet all performance requirements of EN ISO 15874-3 standard. You can reach to international product certifications via Wavin representative.

Versatile, Reliable and Built to Perform

Wavin **PPR Pipes and Fittings** serve a wide spectrum of applications, from **potable water systems** to **heating, cooling, and industrial installations**. Engineered for durability and efficiency, our **PPR system** is a seamless combination of **high-quality pipes, full-plastic fittings, precision-engineered fittings with metal inserts, robust valves, and specialized tools**. Designed to meet the highest standards, it delivers **exceptional performance, long-term reliability, and superior safety** in every installation.

Extensive Product Range

Above Ground Product Groups:

- PPR&PPRCT Monolayer/ Multilayer pipes and fittings
- Flexible PERT Pipes for Radiator heating
- PEX/ PERT pipe coils for underfloor heating
- Underfloor Heating and Sentio control systems
- Tigris Press Fitting Systems
- Wavin AS+, SiTech+ and SiTech B1 low noise systems
- Wavin Quickstream Siphonic Roof Drainage System
- Standard PVC-U Soil & Waste Systems
- HepVO Waterless Trap

Below Ground Product Groups:

- Apollo PVC-O pipes
- PVC-U Drinking Water Pipes
- Wavin Plastic Manholes (Inspection Chambers) & Fittings
- Apollo O-PVC Pressure Pipes
- Oil & Grease Separators
- Road Gullies
- Aquacell ve Qbic plus attenuation and infiltration tanks

Features of PPRCT Pipes

- Wavin PP-RCT pipes are made from Type 4 raw material which is new generation polypropylene designed for hot and cold water systems.
- Better pipe with higher flow rate, improved pressure resistance and light weight.
- Improved pressure resistance at higher temperatures for long term period.
- Larger inner bore and delivers better flow rates
- Wavin PP-RCT can be used with all standard Wavin PP-R fittings
- Available in both monolayer and multilayer options in different colors.

Properties of PP-RCT Multilayer Pipe Options

	BASALT FIBER PP-RCT MULTILAYER PIPE	GLASS FIBER PP-RCT MULTILAYER PIPE
Layers	PPRCT/BASALT/PPRCT	PP-RCT/GLASS/ PP-RCT
Applied Standard	EN 15874-2	
Pressure resistance acc. to Application Classes	1/10, 2/10, 4/10, 5/8	
Pressure resistance @20°C, 50 years	Nominal 25bar	
Pipe Serie, SDR	S3,2 – SDR7,4	
Wall Thicknesses (mm)	20x2,8 – 25x3,5 – 32x4,4 – 40x5,5 – 50x6,9 – 63x8,6 – 75x10. 90x12,3 – 110x15,1 – 125x17,1	
Linear Thermal Expansion (mm/mK)	0,035	

Why Wavin PPR Fittings are Best in Class?

Advantages of PPR-PPRCT Pipe Systems

- ① Durable, robust and rigid system
- ① Lightweight products, easy to carry or install. Light bracketing.
- ① Simple tools and easy installation.
- ① Trusted welding connection, no seal. Safe system.
- ① No corrosion risk and high resistance for chemicals.
- ① High temperature resistance: 95°C short term water temperature.
- ① Long service life. 50 years and more...
- ① Rich product portfolio and high number of fittings due to flexibility of production.
- ① Design freedom for engineers and installers according to enriched portfolio.
- ① High contribution to the circular economy with ease of recycle.
- ① Cost effective performance product.
- ① No bore reduction – Less pressure losses.
- ① Most widely used plastic H&C system all over the world.

Additional Advantages of Multilayer Piping System

All pipes will be extended together with temperatures differences. But the thermal expansion of the pipes will be different according to pipe composition. Thanks to multilayer pipes, pipe expansion can be easily limited.

Multilayer pipes are made of three layer. PP-R or PP-RCT on both inner and outer layer and a special compound of material in the middle of the pipe. This middle layer brings less expansion property to the pipe. Multilayer pipes deliver 3x times better thermal expansion.

“Compound reinforcement brings new features to the pipe.”

Glass Fiber Reinforced Multilayer Pipe

- ① High tensile strength
- ① Dimensional stability
- ① Good thermal conductivity
- ① Readily material for production
- ① Easy to install, no shaving

Basalt Fiber Reinforced Multilayer Pipe

- ① Same features with glass fiber and more...
- ① Basalt fiber production is environmentally friendly and energy consumption is less
- ① Natural, produced from basalt stones and 100% recyclable
- ① Higher impact resistance with lower fiber amount
- ① Unique offering from Wavin, easy to differentiate

Features of Glass/ Basalt Fiber Reinforced Multilayer Composite Pipes

- ① Consist of PPR/PPRCT inner and outer layers and a special mixture of Glass Fiber (GF) or Basalt Fiber (BF) in middle layer.
- ② Middle layer reduces the pipes thermal extension. Besides multilayer pipes can provide all performance features which solid wall pipe have. (Table 2)
- ③ Multilayer pipes have similar thermal expansion coefficient with aluminum stabil pipes have. (Graphic 1)
- ④ The mixture of Polypropylene and Glass or Basalt Fiber minimizes elongation from heat. That is why installation require less bracketing and fixing points.
- ⑤ Alternative solution to conventional pipe systems suitable for e.g., cooling and air conditioning systems, sanitary installations, industrial pipeline construction and rainwater utilization

Graphic 1: Elongation of various PP pipes

Complied Standards	DIN 8077/8078, EN 15874 2, TS 13715			
Pressure Class	SDR 7,4	SDR 6	SDR 9	SDR 11
Diameter Range	20-125			

Why choose Wavin Glass or Basalt Fiber Reinforced Multilayer Composite Pipes?

- 1 Easy to Install
- 2 Time-Efficient
- 3 Cost-Efficient
- 4 Less Expansion
- 5 Compliance to European Standards
- 6 Reliable Technology High Quality

Advantages of Multilayer Composite Pipes:

- ① ML pipes elongates less during the heat changes
- ② Unlike aluminium foiled pipes; there is no need to shave the end of the pipe. The welding process should begin directly. This provides ease of installation.
- ③ Can be easily used for hot water systems. It is a lighter product compared to metal pipes. Therefore, it is easy to carry and install. The linear coefficient of thermal expansion value is small. (0,035mm/WmK). Less bracketing is necessary compared to solid wall pipes.
- ④ Due to the glass fiber reinforced layer, thermal conductivity is smaller than solid wall pipe. That is why less insulation will be enough.
- ⑤ It does not cause a change in the color, smell or the taste of water. It has a hygienic structure.
