

A Smarter, Sustainable Way to Build

Discover Wavin's Building Design Services

wavin

An Orbia business.

A Partner That Shares Your Vision

Wavin's Building Design Services were created with one sole purpose: to take care of what is most valuable to you—your time, resources, and goals. To do so, we developed a trio of services that empower you to build smarter, faster, more efficiently and sustainably.

Introducing The Wavin Way

Transforming challenging projects into optimized, precise, and cost-effective outcomes is what we do best. Leveraging cutting-edge technology, extensive design expertise, and a robust supply chain, we designed three solutions that cater to your project needs: Building Information Modelling (BIM), Design Center, and Prefabrication services.

Unique Projects, Tailored Solutions

At Wavin Building Design Services, we understand every project is one of a kind, and so should be the tools that bring it to life. Whether you are working on large-scale infrastructure or intricate building systems, our solutions deliver the level of accuracy and adaptability needed to ensure successful outcomes.

Building Information Modelling (BIM)
By harnessing our pioneering BIM technology, we visualize, design, and manage projects with greater precision, delivering more efficient, cost-effective models and improving overall visibility.

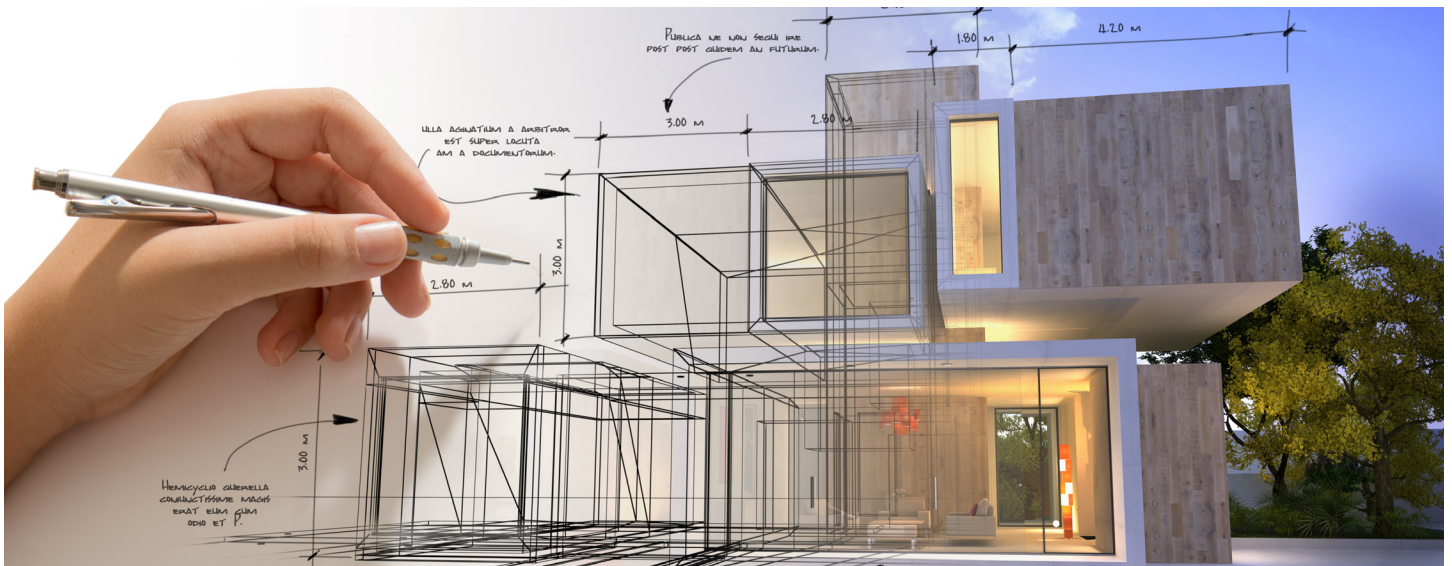

Exceptional
accuracy

Seamless
collaboration

Reduced errors
and rework

Design Center

Our design experts provide customized solutions that optimize performance, minimize material waste, and increase cost efficiency, analyzing your systems to ensure they meet the highest standards of precision and sustainability.

Improved system performance

Models that match reality

Solutions in line with your sustainability goals

Prefabrication Services

Wavin's Prefabrication solutions streamline the construction process by assembling systems in a controlled environment, allowing for quality assurance, waste reduction, and quicker installation procedures.

Faster project completion

Minimized on-site waste and disruption

Guaranteed quality and precision

Global Strategies, Local Actions

Our design support teams are strategically positioned to deliver specialized services to clients worldwide. Composed of experienced engineers and technical staff, our team is committed to delivering your projects on time, with precision, and in alignment with your sustainability goals.

Localized solutions with
a global approach

Services tailored to
specific project needs

Consistent support from
concept to construction

Wavin's Formula For Success

Data-driven Results

Up to 30% reduction in project costs.

Sustainable Practices

Minimized waste that contributes to eco-responsible construction.

Improved Efficiency

Optimized workflows that deliver faster turnaround times.

Seamless Collaboration

Enhanced cross-team communication through real-time data sharing.

Through our advanced BIM technology, specialized Design Center, and industry-leading Prefabrication solutions, we transform concepts and projects into well-built, lasting realities.

Ready To Build Your Best Project To Date?
