

# Wavin Arina LCD Termostat

## Description

Arina LCD Room Thermostat is a digital room thermostat that is created for underfloor heating systems. User has more comfort and energy-saving heating by setting the room thermostat to the temperature it is needed. Users can utilize more comfort and high energy efficiency thanks to adjusting multiple rooms to the different temperature values depending on need.

## Product Features and Advantages

- 2,5 inch wide LCD display
- Wired connection
- Back display lighting in order to make the display easy for the user. (10 minutes later for setting, the lighting power decreases rate of 50%, and when it is not interfered with the lighting goes out to not disturb the user)
- Two different minimum and maximum temperature limit assignments (5-30 °C, 15-30 °C)
- Setting floor temperature (in the range of 23-34 °C)
- Easy use thanks to button on the thermostat. Display provides to monitor current room temperature and floor temperature, following working status, and setting new room temperature.

## Menu Adjustment

- Sensitive temperature measurement
- Temperature calibration
- Determining tolerances of thermostat with hysteresis menu (in the range of 0.1 °C-2.0 °C)
- Floor temperature setting
- Factory reset
- Monitoring of medium temperature on the display when thermostat turns off
- Valve and actuator protection mode
- Freeze protection mode
- Key lock to prevent unauthorized intervention

## Scope of Delivery

- Dowels and screws for assembly
- User manual

## Technical Features

Dimensions (H / W / D)	Dimensions (H / W / D) 85,7 / 85.7 / 33.5 mm
Operating voltage	230 V AC
Relay number key current	7A (240VAC – Resistive Load) 10A (120VAC – Resistive Load)
Temperature measurement precision	(-2.0 °C) – (2.0 °C)
Operating Rate	(5 °C) – (30 °C)
Operating Temperature	(-10 °C) – (50 °C)
Storage temperature	(-20 °C) – (60 °C)
Colour option*	White / Black

\* Please contact us for other color options.

## Settlement of Thermostat

Avoid installing the Room Thermostat in places with high air circulation, such as doorways or windowsills. Also, do not place it in places close to heating units or in direct sunlight. We recommend that the location where the room thermostat is placed is 150 cm above the floor.
